Bin covers

These covers are designed to fit over standard wheelie bins (240 litre). Covers are available for recycling, organics and landfill bins. The covers are colour coded and include signage.

**Please note we do not provide bins. Covers only.*

Water units

These units allow people to refill their water bottles for free. The bubblers allow direct access to drinking water.

**Please note, you will need access to water taps and should allow extra time for set up before events.*

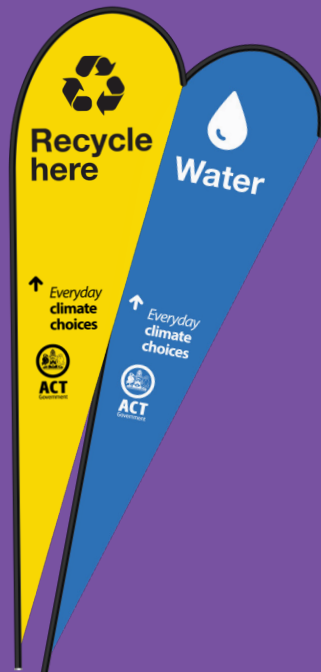

A Frame signs

These signs are great for raising the profile of recycling at your event. Best placed at the entrance or close to recycling bins. Aluminium A frame is approximately 1.2 meters tall.

Tear drop banners

These lightweight signs are great in crowded situations to let patrons know the location of water and recycling bins. They work well even in windy conditions and are easy to move around.

A2 Corflute sign with eyelets

(Please Recycle While You Are Here)
Lightweight signs for raising the profile of recycling at events. These signs have eyelets allowing you to attach them to poles and streetlights.

A3 Vendor Recycle signs

Attach vendor packaging to these signs to assist patrons with correctly sorting their waste.

** You will need to find the best way to attach vendor packaging. Consider using blutack or double-sided tape.*

A2 Waste Signs with eyelets

Recycling, Organics and Waste to Landfill signs to be used with bins to improve waste separation and sorting. Can be especially helpful at back of house areas.

Skip bin signage

These portable signs fit over the edge of a skip bin and can help keep waste separated in back of house areas for large events. Set of skip bin signs include 'mixed recycling', 'cardboard' and 'waste to landfill'.

Container Deposit Scheme bins or baskets

Available for events who would like to collect products accepted by the 10 cent Container Deposit Scheme. By keeping these separate from mixed recycling bins, individual events can arrange for a reimbursement at participating outlets. Suitable for school fetes and community events.

Trailer

Helpful for events needing transport or storage of equipment. Trailer size approximately 5.5 x 1.2 meters.
